

AIRKING

With **low** equipment, operational and maintenance **costs**, **Air King** industrial air cleaners are an **economical** way to **improve** your overall **air quality**.

M-VMC

Air King

industrial air cleaners are a valuable tool for capturing most airborne nuisance particulate. Our self-contained filtration units continuously pull contaminated air through multiple stages of highly efficient micro-glass filters. The filtered air is then re-circulated back into the working environment without the need for duct work. This results in a cleaner, healthier atmosphere for employees, while saving you money by keeping heated or air-conditioned air inside your facility.

APPLICATIONS

- Welding smoke/fumes
- Grinding dust
- Bondo dust
- Oil mist
- Printing powder
- Plastic dust
- Other smoke/dust contaminants

INSTALLATION METHODS

- Floor stand (optional)
- Machine/wall mounted
- Hung with chains or all-thread rods

FEATURES

- Disposable filters..... Cleaner, healthier work environment
- Self-contained Versatility to be used most anywhere
- Easy installation & maintenance..... Cost effective
- Vertical exhaust Directs airflow away from work space
- 16 gauge powder coated construction..... Durable
- Filter change indicator (optional)..... Identifies filter change needs
- Multiple filter configurations available..... Solutions to fit your specific needs
- Vertical or horizontal use..... Fits into your available space
- Easily relocated Accommodates growth or space redesign

BENEFITS

M-VMC

The **Air King** VMC (Vertical Mist Collector) series are our light-duty, source capture options. The units can be ducted to multiple inlets, or used in specific areas to collect irritating oil mist, smoke, chemical fumes or dust generated from metal finishing and forming processes. These self-contained units can be installed directly on or adjacent to a machining center. Ease of installation and low maintenance help make the VMC a practical and economical solution for capturing harmful contaminants.

Typical applications include boring, cnc machining, drilling, hobbing, lathes, milling, quenching, rolling, screw machines, spinning, stamping/drawing, threading, turning centers, wet cutoff sawing and wet grinding.

SPECIFICATIONS	M-VMC (Standard)	M-VMC HE (HEPA Filter)	M-VMCCC (Charcoal Canister)
Dimensions	22"W x 58"T x 24"L		
Weight	185 lbs	215 lbs	260 lbs
Pre-filter	(1) 20"x24"x4" Pleated		
Primary Bag Filter (Merv 15)	(1) 95%, 30" 8 Pocket Bag w/ Loops (90 ft ²)	(1) 95%, 18" 8 Pocket Bag w/ Loops (48 ft ²) with 99.97% HEPA after filter	(1) 95%, 18" 8 Pocket Bag w/ Loops (48 ft ²) with 36 lb. Charcoal Canister Module
Volume (CFM)	2000 CFM	1600 CFM	
Motor	¾ HP PSC; 115/1/60; 8.7 amps		
Power	10' power cord		
Blower	10 x 10 Direct Drive, Single Speed		
Construction/Paint	16 Gauge; River Blue chemical resistant powder coating		
Noise Level 5' dBA	62 dBA		

- Options:**
- Inlet Plenum, 12" tall w/8" collar
 - Pressure Gauge/Filter Change Indicator
 - Stand, 24" tall
 - Oil Drain (for use with plenum)
 - Cabinet Extension, 6" tall
 - Strut Channel Hanging Brackets
 - Aluminum Mesh Pre-filter
 - Silencer (reduces sound by 6-8 decibels)
